USBWebserver v8.6.2 (PHP 7)

CMS SYSTEMS

WordPress
TD-CMS

OTHERS:

MySQL Server
Linux Terminal (Ubuntu Based System)
Apache2

HOBBIES

1. TD-CMS

TD-CMS is a CMS-system which I've built myself. In the beginning, I built it just for fun and to learn more about PHP. But as time went on it became a program that you can seriously use to build a professional Blog website.

infact my one website is based on TD-CMS.

2. TD-RMA

TD-RMA is an application which I made during my internship at (Educanet) which is the ICT department at ROC Kop van Noord-Holland.

I made this application because they were using an Excel sheet for all of the computers that came in for a repair.
